### An Extraordinary Clearance Sale

The stock-clearing movement now in progress in this new store presents some features entirely novel in New York retailing.

It is practically a whole store stocked with the finest goods possible to secure, thrown open to the public's choosing at prices far less than those customarily asked for commonplace grades.

The offers, therefore, include not only the lines of wearing apparel in which one naturally expects to find heavy reductions at this season, but also the staple goods in demand the year around.

The clearance effort is directed as earnestly against the splendidly full line of goods at the more popular prices as against the higher grade goods with which this store has been associated since its opening.

This is a store for everybody at all times. At present it is a store full of bargains for everybody.

Among the stocks offering remarkable reductions are:
